Regional Operations Center
Salt Lake City, UT

WEATHER KEY POINTS

11/02/20 - 11/08/20

Monday-Thursday

- Risk for sneaker waves and rip currents along many of the northern California beaches through this afternoon
 - Sudden larger waves occurring after periods of smaller waves are expected, posing a risk to those on the beach
- Locally elevated fire weather conditions continue across the southern California mountains through midweek, where local wind gusts to 30 mph and very dry conditions are expected
- Areas of coastal fog tonight into Tuesday morning and again Tuesday night into Wednesday morning
- Otherwise, continued quiet, dry, and mild conditions continue through much of the week
 - Exception will be across coastal Del Norte County where some light rain or drizzle is possible later Tuesday and Tuesday night

Friday-Sunday

- Significant change in the weather pattern expected Friday and into the weekend.
 - Some precipitation increasingly likely across the Sierra and far northern California
 - Light precipitation also possible across parts of southern California by the weekend
 - Much cooler temperatures expected statewide by the weekend
 - Fire weather conditions may become elevated for parts of the state during the windiest conditions Friday
